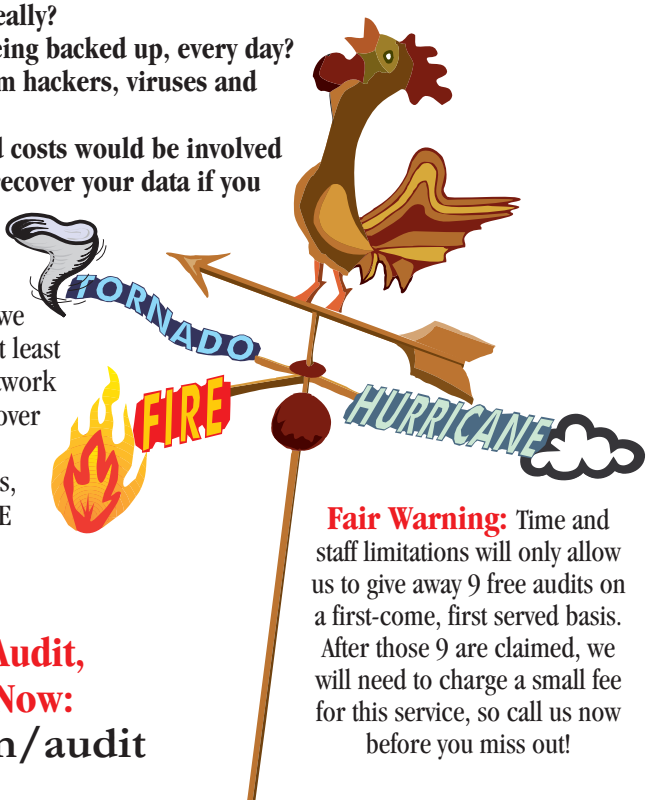
"Disaster Recovery Audit Reveals How Quickly Your Business Could Be Back Up and Running After A Natural Disaster, Server Crash, Virus Attack, Or Other Data-Erasing Catastrophe"

Let's face it…writing a disaster recovery plan is probably NOT one of your top New Year's resolutions – but you can't argue that it IS one of those "important, not urgent" action items that (unfortunately) gets pushed to the back burner.

That's why I want to make it easy for you to finally get your "IT house" in order by giving you a Disaster Recovery, Security and Backup Audit (a $500 Value) – for FREE! At no charge we'll come to your office and conduct a thorough audit to determine:

- **How fast could you be back up and running in the event of a disaster?**
- **How secure is your data…really?**
- **Is all of your critical data being backed up, every day?**
- **Are you really protected from hackers, viruses and human error?**
- **Do you know what steps and costs would be involved to rebuild your server and recover your data if you had to?**



Since this is free, you have no good excuse not to do it now. If we don't find any problems, you'll at least have peace of mind that your network is secure and that you could recover quickly in the event of a disaster. But if we DO find a few loopholes, you'll be able to fix them BEFORE you experience an unexpected catastrophe.

To Claim Your FREE Audit, Go To This Web Site Now:
www.christoit.com/audit

Fair Warning: Time and staff limitations will only allow us to give away 9 free audits on a first-come, first served basis. After those 9 are claimed, we will need to charge a small fee for this service, so call us now before you miss out!
